1	It's hard to go to every airline website to check the price and book the flight.	Google Flights	User-friendly Interface, It gives multiple airport options, when departing or arriving, take into account adjacent airports.	The efficacy of the fare tracking and warnings provided by Google Flights might vary. Some customers claim to have gotten notices for tiny price changes, but others may not have gotten alerts for big fare decreases.	As The brand value of a company is prioritized over travel costs on the Google Flights page. If Google Flights is frequently giving you trouble, you might want to look into alternative airline search engines and booking sites like Expedia, Easemytrip and Skyscanner. (or) adding all kinds of airlines to the google flights website irrespective of their brand value.	Student
2	Difficulty in finding jobs, internships, to strengthen professional relationships and to learn the skills you need to succeed in your career.	Linked In	Obeys the accepted procedures. The individuals are simple to get along with. The server for LinkedIn is always available.	Interface on Desktop is easier to use when it is compared with the interface on mobile.	The layout of Linked In Content is not organized. Because there is no structural framework, there is overlap in the material, which detracts from the user experience by not being user-responsive. The aspect ratio of electronic devices, such as tablets, smartphones, and laptops, should be taken into consideration while designing the LinkedIn app and website.	Student

<b>3</b>	Viewing live sports of all kinds from different areas of the world may be challenging.	Willow sports streaming platform	High Quality Cricket Streaming, Multi-Language Commentary	When compared to television broadcasts, live streams on Willow TV can have a very minor delay. If customers wish to watch games in real-time, this delay may be a drawback.	The Willow streaming app does not offer a way to cancel an account. One should send a letter to willow mail ID to unsubscribe from the account. Slight changes in the User- Interface design of Willow App makes it user friendly.	Student
<b>4</b>	Purchasing necessities from places that are far from our location is difficult.	Walmart app	Easy to re-order the same set of items ordered before.	The availability of goods is not updated regularly which in turn affects user by delivery different product rather than the ordered product.	There is no proper tracking system for Walmart delivery agent. Using Better satellite tracking API 's to find the exact location of delivery agent.	Application Software Engineer
<b>5</b>	Difficulty in taking the attendance of students and teachers.	School Attendance (SIMS-AP)	Compatible with all types of smart phones.	The facial recognition does not work when a person wear spectacles. Lagging, Zeroing the location is not consistent, Unable to capture the attendance.	The time is updated in the log out time when users attempt to change their login time. Changing the UI may help to update their login time easily.	Teacher
