

Person ID	Problem	App/Website Found	Likes	Don't Likes	Improvements	Education/ Occupation
1	The brand value of a company is prioritized over travel costs on the Google Flights page.	Google Flights	User-friendly Interface, It gives multiple airport options, when departing or arriving, take into account adjacent airports.	The efficacy of the fare tracking and warnings provided by Google Flights might vary. Some customers claim to have gotten notices for tiny price changes, but others may not have gotten alerts for big fare decreases.	Think About Alternative Platforms: If Google Flights is frequently giving you trouble, you might want to look into alternative airline search engines and booking sites like Expedia, Easemytrip and Skyscanner. (or) adding all kinds of airlines to the google flights website irrespective of their brand value.	Student
2	The layout of Linked In Content is not organized. Because there is no structural framework, there is overlap in the material, which detracts from the user experience by not being user-responsive.	Linked In	Obeys the accepted procedures. The individuals are simple to get along with. The server for LinkedIn is always available.	Interface on Desktop is easier to use when it is compared with the interface on mobile.	The aspect ratio of electronic devices, such as tablets, smartphones, and laptops, should be taken into consideration while designing the LinkedIn app and website.	Student
3	The Willow streaming app does not offer a way to	Willow sports streaming platform	High Quality Cricket Streaming, Multi-Language Commentary	When compared to television broadcasts, live streams on Willow TV can	Slight changes in the User- Interface design of Willow App makes it user friendly.
